## Profile

Product Designer and UX/UI Designer with 4 years in product design and 8 in digital design. I design digital and B2B SaaS products end to end in Figma: discovery, flows, design system, prototypes and handoff. I also build in Bubble.io with AI integrations, so I design with technical feasibility in mind. Experience in agile teams, working directly with clients and mentoring junior designers.

## Skills

## Experience

### Helios
August 2025 - Present

*Design Lead*

AI-powered B2B SaaS recruitment platform with company, recruiter and candidate roles.

- Technical leadership of the project: defining architecture standards, prioritizing the backlog and managing the MVP roadmap in Bubble.io to ensure scalable delivery.
- Designed multi-role screens in Figma (dashboard, open positions, position detail for company and recruiter) before building them in Bubble.io.
- Designed the free-to-premium conversion landing page for company users.
- OpenAI API integration: designed prompts and CV-analysis flows to automate matching between candidates and open positions.
- Technical and functional documentation: translating business requirements into clear tasks, estimates and concrete deliverables for the development team.

### Helios
May 2025 - November 2025

*Product Designer (UX/UI)*

- User research: interviews, surveys and data analysis to identify critical needs and friction points.
- UX design: user flows, experience maps, wireframes and high-fidelity prototypes in Figma focused on reducing friction.
- UI design in Figma: built the product design system with reusable components, variables, auto layout and color and typography tokens, applied consistently across all platform roles.
- Usability testing: ran testing sessions and gathered feedback for continuous product iteration.

### Radium Rocket
September 2022 - November 2024

*UX/UI Designer*

Software agency. Embedded designer in client teams across fintech, B2B e-commerce, agribusiness, healthcare, ERP and education.

- Qira Pagos (ALZ Agro): designed in Figma the bilingual digital wallet for the agricultural sector, with accounts in pesos and grains, live on the App Store and Google Play. Kept a consistent design system across both languages.
- Qira Global (ALZ Agro): led design and maintenance of the agricultural supplies e-commerce platform for producers.
- Designed web and mobile interfaces in Figma, from wireframes to high-fidelity prototypes and developer handoff with Dev Mode.
- Worked directly with clients and cross-functional teams (Product Managers, developers, stakeholders) to gather requirements, present proposals and prioritize UX initiatives.
- Ran user research and usability testing to turn findings into actionable design decisions.
- Took part in all agile ceremonies: sprint planning, dailies and retrospectives.

- Mentored junior designers on craft, standards and process, and worked with design leadership on organization-wide design standards.

**Freelance** 2018 - October 2022
*Graphic & Web Designer*
- Graphic design for social media: visual assets for Instagram and WhatsApp for various clients.
- Web design and development: static, informational websites for local clients.

**Comercial CAB** 2020 - 2022
*Web Content Creator & Marketplace Operator*
- Created content for social media and Mercado Libre, including listing copy and visual material.
- Handled buyer questions and messages, online sales invoicing and customer support.
